New and better design for your new life style

Control of Your Smart Home is Easier than Ever Before!

iRidium mobile is one of the best software solutions to control your Smart home, Home cinema, Multiroom system, etc.

With iRidium mobile you can easily control lighting and blinds, adjust the temperature of heaters, conditioners or floor heating, learn the state of all devices in your Smart home. What is more - you can do all of it by using smart phones and tablets, devices that you have at your fingertips almost every minute of your life!

That is why we care a lot about the visual part of the interface. We make every customer happy with an attractive individual design, which at the same time is simple, intuitive and multifunctional. Our basic concern is to make Smart Home control user-friendly and intuitive.

Our designs will let you enjoy full control of your Smart home.
